

Flight::exhaust_rate

Flight::flight_duration

Plane::get_average
_speed

```
graph LR; A[Flight::exhaust_rate] --> C[Plane::get_average_speed]; B[Flight::flight_duration] --> C;
```

The diagram illustrates a data flow where two attributes from a 'Flight' object, 'exhaust_rate' and 'flight_duration', are used as inputs to a method 'get_average_speed' on a 'Plane' object. The inputs are shown in white boxes on the left, and the output method is in a gray box on the right. Blue arrows indicate the direction of the data flow from the inputs to the output.
